General Comment

PLEASE.. ban glyphosate. There is a plethora of independant studies that point to the damage glyphosate does. The contamination of other crops via drift can not be addressed. The levels in our waters and soils cannot be denied. All our 'new' disease trends, bee colony collapse, soil depletion, diabetes, cancers..are suspect to be connected.- look at a timeline of those posted with a timeline of release of GMO and thus increased glyphosate usage.

The correlation is clear. It is destroying the planet and humanity. GMO were released by the FDA illegally. The 1958 Food Drug and Cosmetic Act (FDCA) established standards for safety and purity. It was ignored. The testing required was never done. From its inception the statute (FDCA) took a strong precautionary stance.

It is all well documented in the book, Altered Genes, Twisted Truth by Steven Drucker. He documents the inside memos of the

FDA at the time of their release to show how political it was. THE GENIE is out of the bottle. YOU CAN RIGHT THE WRONG NOW. Stop the usage of glyphosate until it has been FULLY tested for ALL the avenues

The EU understands, This is a global issue..

I ask that you do not issue a permit for glyphosate.

We need to find a better way.
